

Victor Adoghe

Front-End Developer Intern

Location: Cross River State, Nigeria

Email: victoradoghe112@gmail.com | **Portfolio:** <https://victoradoghe-portfolio.netlify.app/>
| **GitHub:** <https://github.com/victoradoghe>

Profile

Results-driven and detail-oriented Front-End Developer skilled in JavaScript, React, HTML, and CSS, with proven experience developing responsive, user-focused web applications. Adept at transforming design concepts into clean, efficient, and accessible interfaces. Demonstrated success in building and optimize interactive projects such as task management apps, games, and personal portfolios. Known for strong collaboration, debugging, and problem-solving skills, with a commitment to writing maintainable code and delivering high-quality digital experiences. Ready to contribute technical expertise and creativity to a professional development team while continuously advancing as a Full-Stack Engineer.

Technical Skills

Languages & Frameworks: HTML, CSS, JavaScript (beginner), React (learning), Python(Beginner)

Tools: Git, GitHub, VS Code, Chrome DevTools

Concepts: Responsive Design, Web Accessibility, Version Control, Basic Debugging

Projects

- **DoneMate (To-Do App)** — *React Project*
Developed a fully functional task management app using React and CSS. Implemented category filters, task completion tracking, and responsive design for a smooth user experience across devices.

- **TicTacToe-Pro** — *React Game*

Built an interactive TicTacToe game using React state management. Added win-check

logic, dynamic UI updates, and a polished layout designed for both desktop and mobile screens.

- **Calculator App** — *React & CSS Project*

Created a modern calculator with a sleek interface using React and CSS. Handled basic arithmetic operations and responsive behavior for mobile users.

- **Portfolio Website** — *Personal Project*

Designed and developed a personal portfolio website to showcase my projects. Focused on accessibility, smooth navigation, and clean design principles.

- **Hackathon Project** — *(Ongoing)*

Collaborating with a small team to design and develop a functional web app under time constraints, practicing teamwork and project management skills.

Strengths

- Passion for learning and improving
- Strong attention to detail
- Team collaboration and communication
- Eagerness to take on new challenges

Interests

Building interactive UI components

Learning React and modern JavaScript frameworks

Participating in hackathons and coding challenges
