PROJECTS

DoneMate - To-DO List Web Application

- Developed an intuitive to-do web app using **React** and **CSS**, enabling users to add, edit, and manage daily tasks efficiently. Integrated **Supabase** for user authentication and data storage, ensuring a secure and personalized experience. Focused on **clean UI, state management, and responsive design** to enhance usability across devices.

TicTacToePro - Interactive Web Application

- Built an engaging **Tic-Tac-Toe** web game with **React** and **CSS**, featuring smooth gameplay logic and responsive layouts. Implemented dynamic game states, win detection, and user interactivity to demonstrate proficiency in **DOM manipulation and JavaScript algorithms**. Designed for seamless play on both desktop and mobile devices.

Live-Card - Interactive Card Generator

- Developed an interactive virtual card generator using **React** and **Tailwind CSS**, allowing users to input their details and instantly preview a realistic ATM-style card. Implemented real-time state updates for smooth, dynamic interaction and crafted a **clean, responsive interface** optimized for all devices. Focused on delivering an engaging user

experience with polished styling, **intuitive controls**, and **seamless component-based design**.
