PROFILE

Front-End Developer | JavaScript, React, and Responsive Design Enthusiast.

- *Front-End Developer proficient in JavaScript, React, HTML, CSS, and responsive design, experienced in developing dynamic user interfaces and cross-browser web applications. Skilled in applying modern frameworks, version control (Git/GitHub), and UI/UX best practices to deliver efficient, scalable, and mobile-friendly solutions. Currently pursuing a Bachelor's degree in Computer Science with a focus on front-end development and web performance optimization.*

WORK EXPERIENCE

Frontend Developer - Personal & Team Projects   2023 – Present
                                                            Cross River State,
                                                            Nigeria

- Built **real-world web applications** using **React** and **CSS**, focusing on **responsive layouts**, **accessibility**, and **modern front-end design patterns**.

- Collaborated on multiple projects emphasizing **clean UI**, **performance optimization**, and **cross-browser compatibility**.

- Contributed to **GoodMorningToAll.com** 🔗 by implementing **front-end design components** and ensuring that layouts were fully responsive and visually consistent with the design team's specifications. Improved user interaction and interface flow through modern styling practices and component-based design.

- Contributed to **ClearVisa**, a web platform designed for schools, by enhancing its **accessibility features** and overall user experience. Implemented semantic HTML structures, ARIA labels, and improved visual hierarchy to make the platform more inclusive and easy to navigate.
